

Kitchcu

Portal links ? credentials policy ? feature ownership ? test steps

Kitchcu cloud kitchen platform

Audience: CEO, CPO, CTO, QA, Ops, Support

Three executive lenses:

- Portals - kitchcu.com surfaces and who uses each
- Credentials - demo vs production (never commit prod secrets)
- QA - feature responsibility + Must test steps

This guide includes:

- Production: kitchcu.com, customer / kitchen / admin / api.kitchcu.com
- Demo logins for local QA; production admin@kitchcu.com + Secret Manager
- Weekly QA cohort + GCP bulk-seed.sh / systemd timer at /opt/ckac
- Cities presence: Delhi NCR, UP belt, Dehradun, Mumbai + coming soon
- F01-F48 condensed matrix with test steps

Version 1.1 | September 2026 | Confidential

Table of Contents

PART 0 - Portals & Access

1. Production portal URLs
2. Credentials policy
3. Cities presence
4. i18n

PART I - Feature QA

5. Orders & intake
6. Growth, menu, ratings
7. Delivery, discovery, payments
8. Platform smoke

Portals & Credentials

1. Production portal URLs

Surface	URL	Persona
Marketing portal	https://kitchcu.com	Prospects / owners
Customer PWA	https://customer.kitchcu.com	Diners
Kitchen PWA	https://kitchen.kitchcu.com	Owners
Admin console	https://admin.kitchcu.com	Platform staff
API gateway	https://api.kitchcu.com	All clients
Media	https://media.kitchcu.com	Assets

Local: portal :13000, customer :13001, kitchen :13002, admin :13003, gateway :18000.

2. Credentials policy

Local / demo (QA)

Persona	Login	Notes
Owner	9876543210 / OTP 123456	Kitchen CKPNQ001 + multi-city kitchens
Customer	9123456789 / OTP 123456	Extra phones in AGENTS.md
Admin	admin@kitchcu.dev / admin123456	Dev only

Production

- Super Admin: admin@kitchcu.com + ADMIN_PASSWORD from GCE / Secret Manager
- Do NOT use admin@kitchcu.dev on production
- OTP 123456 is refused when APP_ENV=production
- Razorpay / WhatsApp / OAuth secrets via Admin Control -> API Keys (masked)
- Never commit production passwords or live API secrets

How to hit login-required APIs

- Swagger: localhost:18000/docs (prod https://api.kitchcu.com/docs)
- Super Admin Sign in prints username + password and links Swagger / ReDoc / portal / openapi
- POST /api/v1/admin/auth/login then Swagger Authorize with the JWT
- Owner/customer APIs use OTP, not the admin password - docs/API.md 1.1

3. Cities presence

- Live: Pune, Mumbai, Delhi, Gurugram, Noida, Lucknow, Kanpur, Prayagraj, Varanasi, Jhansi, Dehradun
- Coming soon: Bengaluru, Hyderabad, Chennai, Kolkata
- Shown on portal home, kitchen landing (services), customer discovery (#cities)
- Seed: DEMO_KITCHENS_CITIES via seed-dev-data / seed-all.ps1

4. Multilingual

- Locales: en hi mr ta te kn ml bn gu pa bho mai
- Parity: python scripts/check-i18n-locale-parity.py
- Sync: python scripts/sync-i18n-missing-keys.py
- Admin UI stays English by policy

Feature Responsibility & Tests

1. Orders & intake (F01-F06)

ID	Responsible for	Test steps
F01-F02	WA / message -> draft	Draft appears; confirm creates order
F03	Manual / walk-in order	New order -> Active tab
F04	Lifecycle statuses	Advance received->delivered; C track upd
F05	History	O All + C My orders
F06	Multi-kitchen cart	2 kitchens -> one checkout -> sub-orders

2. Growth, menu, ratings

ID	Responsible for	Test steps
F07-F12	Reports / tips / golden days	Reports KPIs; pin golden recipe
F13-F15	Live menu & categories	Add dish with times; category filter
F19/F19b	Stock + bulk prep	Accept deducts; prep batch prepared
F16-F18	Home-taste ratings	Deliver -> rate -> aggregate
F21-F24	Learn / trials / ranks	Learning nav; city rankings
F39	Daily menu WA	Template / daily menu send path

3. Delivery, discovery, payments, live

ID	Responsible for	Test steps
F27-F31	Radius, fee, track, ETA	Quote at checkout; track link
F32	Discovery + cities	Search; #cities Live chips
F33-F38	Reorder / plans / CRM	Reorder; coupon; CRM list
F42-F44	Pay + split	Checkout intent; multi-kitchen settle
Refunds	UPI/bank payout	C Account UPI; O refund status
F45-F48	Notify + live stream	Status notify; Go live / watch

4. Platform smoke (production)

- GET <https://api.kitchcu.com/health/ready>
- Open kitchcu.com, customer, kitchen, admin -> HTTP 200
- Admin login with production credentials only
- Customer #cities section visible; language switcher works
- Confirm APP_ENV=production rejects OTP 123456

5. Source of truth

Markdown: docs/PRODUCTION-PORTALS-CREDENTIALS-QA.md. Regenerate: python scripts/generate_production_portals_pdf.py. Deep acceptance: CKAC-COMPLETE-PLANNING-BENCHMARK.md. Deploy: DEPLOYMENT-GCP.md.
